

A Beachcomber Hot Tub is a breath of fresh air in your life.

We chose the title “A Breath of Fresh Air” for this book because Beachcomber is concerned with nature and the environment. Simple, yet beautifully designed, our hot tubs offer you the ultimate outdoor comfort while relaxing in your back yard in all seasons.

In the mid-seventies Keith and Judy Scott, the founders of Beachcomber, believed that the outdoors, and especially your garden, is a very special place that you don't visit often enough. They took their personal Beachcomber Hot Tub and designed a room called a private outdoor domain (POD) – by positioning their own hot tub just a few steps from their back door. Inspired to provide an equally tranquil and soothing outdoor retreat for everyone, they resolved to make available “affordable waterfront property” outside your back door which they called “A Beachcomber”.

The Beachcomber Hybrid Edition™ model 750

How do I know I'm getting the most, or the best value for the price I am paying?

A true point of difference with Beachcomber is that you get the same top quality and guarantee; right from our largest, executive 750 model, down through to the traditional, round 321 model. The only difference in price in our complete lineup of different models is the size, design and options you choose. When you buy a Beachcomber, you can feel great about your purchase knowing that you get the same top quality and guarantee. And with Hybrid Edition, you get extra options and features to save you money.

Do more jets make a hot tub better, and how many do I need for massaging?

With AllActive Seating, you get the maximum massage with all of our seats running at the same time, for all bathers. It's a unique feature today - plus you can customize the number of jets you want at no cost to you. Many of our WaterPorts can have from 1 to 7 jets, to let you design the number of jets, massage intensity, type of massage feeling and width of spray you desire. All you do is build your favorite seat with the jets you want. Our hydrodynamic

design has been studied by our engineers to provide you with the proper pressure at each Waterport location. It's a simple, straight forward way to give you the number of jets you want for the maximum massage therapy and enjoyment.

How much money does it cost to operate a Beachcomber Hot Tub each month?

To explain it simply, our typical hot tub monthly cost would be less than the cost of a sandwich and a bowl of soup at your favorite spot. A recent analysis established new energy efficient guidelines, and tested Beachcomber's small, medium and large hot tubs. The independent lab commissioned by the government approved all of our hot tubs for maximum energy efficiency. As one of the founding hot tub pioneers, we care deeply about every aspect of hot tub operation, and study it continually.

Does a Beachcomber Hot Tub require a lot of maintenance to look after it?

The simple answer is no - you may not realize that Beachcomber Hot Tubs today are automatic in many respects. Many components require no maintenance at all, like our Enviroskirt Cabinetry. When it comes to caring for the water, we engineer our Energy Saver equipment for proper circulation, heating and cleaning so that you can enjoy fresh, clean water and not worry about maintaining it. Your local store can show you how easy it is - and if you ever have a question or concern, you can call Beachcomber's North American Customer Care support line. Our goal is to help you connect family, friends and loved ones in your Beachcomber Hot Tub.

beachcomber 750

the ultimate in comfort.

The Beachcomber 750 is the ultimate expression of the Beachcomber philosophy—with simplicity in form, fit and function. It's our most spacious hot tub, so there's more room to soak in perfect comfort. The 750 offers the most flexible seating configurations for the optimum therapeutic massage action for your neck, back and feet.

COMPLIANCE TESTED
ENERGY COMMISSION GOVERNMENT APPROVED

The Beachcomber Hybrid Edition™ Hot Tub

“All four sides of a hot tub's interior cavity are foam insulated, with every available space filled. Efficient plumbing design with an external management control system maximizes waterport hydrodynamics which gives all active seating, using the least number of massage pumps with the lowest possible horsepower and energy use.”

Eco4WALL™ Sealed Insulation Package

Every available space of the hot tub cavity is spray filled with energy saving, Icynene foam to maximize heat retention of the hot tub vessel. The vapor barrier insulation rates at a high R3.6 per inch providing the best energy efficiency, and prevents moisture or air penetration. Icynene is used to thermo-proof today's eco-friendly homes for superior conservation, in any type of climate.

Energy Saver™ Management System

Program up to the minute water flow to reduce power use and save money. Our engineers design size equipment properly to reduce horsepower on every model. Our quick-disconnect system allows quick service, preserving heated water without draining. Built in concert with Eco4WALL Sealed Insulation, you have a Hybrid Edition hot tub giving maximum massage with the lowest energy use.

Hush Pump™ System

Cleans, heats and filters 24/7. Proper turnover design gives you clean, fresh water with the lowest power consumption .

Enviroskirt™ Cabinetry

A high grade, durable, maintenance free cabinet with hand-crafted furniture grade quality.

ClearTech™ UV Water Care Ready

Hybrid Edition is factory prepared to accept an optional UV cleansing system for clean, fresh water.

SafeAxis™ Steps

Enjoy safety, ease of entry and exit with a wide, non-slip landing pad and twin side steps. This is your Hybrid equipment cover.

Reflex Foot Massage™

Our exclusive hydro flow powered plumbing system delivers the ultimate 'health spa' massage for health and wellness.

Power Guard™ Heatshield Cover

Our energy-saving, high density inserts with thermos bottle style gives energy efficiency in all weather conditions.

Perma-Seal™ Foundation

Our full size base completely seals and protects from ground moisture or pests. It is impervious to the elements.

EverLite™ Underwater Moodlighting

Moodlighting gives added safety and ambiance and uses less energy in a year than the cost for a single cup of coffee.

Britewerx™ Massage Inserts

Enjoy extra sparkle in the water with the added flexibility to choose the number of jets you need at no extra cost.

Metallic Finish Acrylic™

Acuralux cast acrylic finish is tough and durable. A hint of sparkle enhances the overall look, like a fine European car.
